This month has been exhilarating for all of us at [PadCare](#). What started as an idea four years back has today turned into a strong team of 50+ revolutionizers and over a million impact beneficiaries.

We were born out of a looming disaster, that of period plastic. We were born out of a mission to make periods planet-friendly and do it democratically.

It's delightful for me to announce that we have raised 5 Crore in our Seed funding round. It's an honor to have [Social Alpha](#), [Lavni Ventures](#), [3i Partners \(Impact India Investment Partners\)](#), and [#SpectrumImpact](#) join our sustainability journey. Our passion for sustainable menstruation just got doubled! Grateful for their belief in us and excited to kick off a new chapter together.

As we look towards our future and the opportunity Clean-Tech in India holds, we realize that we have only scratched the surface, there is so much more to do. There's a long way to go toward helping our country and its businesses be sustainable and more inclusive.

We are just getting started!

We raised
5 Crore
in SEED Round!
